

The next generation of Decra

Welcome to the new generation of Decra tiles, with even greater weatherability, increased warranty and more choice than ever before.

FREE TILES - when the owner of an existing Decra roof on the Shetland Isles purchases a NEW Decra roof, Decra will contribute the specially designed eaves course of "Shetland" tiles along with a discount on the whole system - meaning that a Decra roof is even longer lasting, lower maintenance, lower cost and even more resilient to the strong and punishing wind action.

The confidence in Decra Tiles has never been higher with product guarantee increased to 40 years.

Join the next generation.
